Farmers !

DON'T FORGET 1916.

The disappointment and inconvenience caused to many farmers in this district during 1916 through not getting their supplies should not be forgotten.

THE SAME CONDITIONS PREVAIL NOW, with the likelihood of their getting worse as the season advances.

Farmers ! Let me know your requirements at once, and I promise to fill all EARLY orders. Later orders must take their chance. Some lines of goods are going to be oversold before seedling commences.

I want to give you the best service possible, and ask you to assist by letting me know what you need.

S. G. JAMIESON

Lethbridge Avenue
Bow Island

Printing Orders from School Districts receive prompt at the District Printing Office, Bow Island.

Blizzards in Dakota.

Siox City, S.D., Jan. 31.—Extreme cold, high winds, and drifting snow had tied up all trains in most parts of South Dakota today. The blizzard is the worst since 1888. Huron, Aberdeen and Pierre report complete tie-up of traffic.

Pierre, S.D., Jan. 31.—The storm has tied up all train movement. All trains here are being held and none moving in this part of the state. A driving wind is drifting the loose snow and a temperature of 15 below zero adds to the discomfort of the situation.

Fargo, N.D., Jan. 31.—The country surrounding Fargo was in the grip of a biting twenty-mile wind today, driving before it a light snow. The temperature at seven o'clock was 15 below zero and falling.

A Worthy Object

It is necessary to say a word on behalf of the Belgian Relief Fund? We owe much to the Belgians. The Belgian people are on the verge of starvation. The need today is more insistent than ever. As a result of the cruel deportation of Belgian men, the women and children are more helpless than ever. The cost of foodstuffs is higher. We have abundance. Shall we not put forth every effort to save the Belgian people. Support the cause by buying tickets for the concert in the I. O. O. F. Hall on Thursday next. Miss Idaline Himeyett, dramatic entertainer and eloquentist, will provide an evening's enjoyment equal to the best Bow Island has had in the past.

Philomathian Soc'y.

(Continued)
At this season of the year, as your amiable and frequently witty correspondent "Minimus" asserts, they are to be found, "those delightful experiences to the life of culture—Literary and Debating Societies." It is amazing, however, that after the cruel exposure of the harmful characteristics of such organizations with which "Minimus" shocked society in his brilliant article last week, the members of the above society have had the temerity to show their faces upon the face of the earth. More amazing still, on Tuesday last to hold their regular meeting and to discuss, not such an empire-shaking theme as that on "the Baby's Bottle," which probably as "Minimus" suggests, cured him for ever, but an altogether childish and praiseworthy issue—"Government ownership of Public Utilities." In spite of the cold, thirty below zero, a good audience of intelligent-looking people gathered and seemed mightily interested in the discussion. Sounder or sicker they thought it was a live issue—a matter upon which wide-awake men everywhere are thinking. They went away feeling that their time had not been wasted. They looked as though they had enjoyed themselves.

Poor deluded mortals! Poor "Minimus" he cannot defend Literary and Debating Societies, but the unforgiving reflection must be forced upon him that they will arrive in spite of him. Ah! the frailty and blindness of human nature.

P.S. Don't forget the next meeting of the Philomathian Society, on Thursday, February 8th, in the Oddfellows' Hall, in behalf of the Belgian Relief Fund.

METHODIST CHURCH
Methodist church service on Sunday, February 5th.

The Sacrament of the Lord's Supper will be administered at the close.

The Ladies' Aid will meet at the Parsonage on Thursday, February 8th at 3 p.m.

For Sale

RULES

1. An entry fee of one dollar will be charged (which entitles the exhibitor to membership in the Agricultural Society of Winnifred for the year 1917) and ten per cent off the prize for which entry is made.
2. Competition open to residents of Alberta.
3. All seeds entered for competition must have been grown in the Province of Alberta by the exhibitor in the year 1916.
4. All entries must be in the hands of the Secretary by 5 o'clock p.m. of the evening preceding the Fair.
5. Each entry must be accompanied by a signed statement as to the number of bushels the exhibitor has for sale and the price per bushel.
6. No seed shall be admitted for competition for prize unless the seed for sale, as represented by the sample exhibited are at least, 25 bushels of wheat, 50 bushels of oats, 25 bushels of barley, 15 bushels of flax, 5 bushels of grass, clover and alfalfa seed and potatoes 15 bushels.
7. No premium shall be awarded to exhibitors that contain impurities, which, in the opinion of the judges are of a noxious nature.
8. The Management of the Seed Fair shall have the power to withhold any money from, or deduct from future Fairs any exhibitor who violates the rules.
9. No exhibitor shall receive more than one prize in any one class.
10. For identification the exhibitor must place his name and address on labels attached to the sacks containing the grain or seed for exhibit. The labels will be replaced till after judging by regular entry tickets.
11. All samples of seeds will be labelled immediately after judging with the name and address of the exhibitor, the name of the variety, the amount of seed for sale and the selling prices.
12. All exhibits must be in place of exhibition not later than noon of the day of the Fair.
13. Not less than one bushel of potatoes will be accepted as an exhibit.
14. Exhibits will not be returned unless the exhibitor so requests and then at his own expense.
15. All exhibits not returned will be sold to the best advantage and the proceeds forwarded to the cause.
16. In case of a dispute a statutory declaration that the above rules have been complied with may be required from each or any exhibitor of seed.

All Things... Considered.

ABOUT TRAVEL

Just now when so many of our travelling citizens are away holiday making I begin to meditate upon the pleasures of Travel. Personally I enjoy California and Mexico and Wyoming very much. I look at the pictures of them all colored at the back of Southern Magazine and I am quite positive: sure that they aren't really as pretty as that; and if I did actually go I should only be disillusioned. So I stay in Bow Island.

As a matter of fact, a little city like this is much more romantic. When you simply can't get away from a place you just have to "make the best of it," and that is the heart and core of Romance,—"making the best of it." All shipwrecked mariners know this. Robinson Crusoe knew it.

After all, people go away not to get excitement, but to avoid it. All the folk who throng the Main St. of Bow Island have no more interest for them. These travelling pleasure seekers are tired of us in Bow Island, whereas they have not got to know us yet.

Travelling over the wastes of Wyoming is not exciting. It is not even scintillating. Quarrelling about the washing bill in Bow Island is much more exciting. And for a change of out-of-pocket, and for breaching the solid California or Cincinnati it is not worse. All you have to do is to discuss the Millennium with (say) your Minister.

No, no. I did think of going down for a week and to see my friend "Nicotragus Coland" you know the one who writes me those beautiful letters. But, as I say, the real thrilling thing is not travel but staying where you are. Being "cooped up" in fact. It is when you're "cooped up" with your next door neighbor that world of revelation opens themselves to you. You begin to know him. Because you can't get away from him.

Romance at Niagara! Hoos, too! (as the Scotch say.) If you want romance, your next door neighbor will give it you. Romance is generally made up of Love and War. From your next door neighbor you will get either or both. For as I read the other day "A man may make his own friends, he makes his own enemies; but God makes his next door neighbor." And a next door neighbor can be a Terrible Thing. It is he who has

sent all these people travelling.

The famous Doctor Johnson was once asked by Boswell what he would do if he were locked up in a tower with a baby. The Doctor's reply is not recorded, but I can see that Boswell had got hold of the right idea of Romance and Adventure. He knew that the real change of mental outlook comes from being "cooped up" and not being able to get away. It was really bright fellows like Boswell who named this to account in writing tales of shipwrecked mariners and unaccounted men.

Imagine yourself, O reader, snowed up, say, in the Seven Persons' Library here and unable to get out for six weeks. All you had was a copy of the Bow Island Review to read, and one bottle of two per cent. ice drink, and you and the population (which would of course now be right), had to get along on that! What new worlds would be opened to you! What conversations, and breathing of mental outlook there would be! You would mighty soon find that true excitement is not in travel, but in staying where you have got to remain.

—Minimus.

Local and General.

A Brownmanson was a visitor to Medicine Hat on Wednesday. Owing to the severe cold weather there has been no school this past week.

W. A. Bateman, D.D.G.M. installed the officers of the Masonic lodge at Taber on Tuesday night.

W. H. Stady, accountant, and S. F. McCloskey, ledger keeper, respectively, at the Union Bank spent last week-end in Medicine Hat. They report a good time.

F. E. Willmott has removed his carpentry business from Main Street to the store on the corner of Lethbridge Avenue and Bell Street, near C. P. R. railway crossing.

It was inadvertently stated in our last issue that the Redcocks were holding a little social evening last Friday. This should have read Friday of this week.

February clearance sale. 25 per cent. off all winter hats. 10 per cent. off all fancy goods, ladies and children's wear, etc., during the month of February. Mrs. Geo. Bruce, Milliner.

A. W. Linton of Foremost is having a large auction sale on March 1st on sec. 25, tp. 6, range 10. A large number of valuable horses will be offered. Look his advt. up this week.

The coldest spell of the winter has been experienced during the past week, the thermometer ranging from 10 to 40 below. On Thursday a blizzard was raging all day and a large part of the night, making things decidedly unpleasant.

The concert given here on Monday night under the auspices of the local Red Cross was well attended, and the artists received a generous measure of applause. The hall had been prettily decorated for the occasion with flags, etc., kindly loaned by F. W. Brown.

The annual meeting of the congregation of All Saints' church was held at the Mission House on Tuesday night. In spite of the cold weather there was a fair attendance. Officers for the church for 1917 were elected as follows:—Rector, Warden, F. W. Brown; People's Warden, W. Pith. The members of the Ladies' Aid, who held their meeting at the same time, elected their officers as follows:—President, Mrs. J. Russell; Vice-president, Mrs. W. P. Cotton; Secretary, Mrs. R. Rainbow. After the business had been transacted, a very pleasant little time was spent in social converse and in partaking of many little delicacies supplied by the ladies.

Big Fire at Vulcan.

Vulcan, Feb. 1.—Vulcan suffered the most disastrous fire in its history this morning, when four buildings of the main street of the town were burned down. The houses were grossly handicapped through two chemical engines being frozen up. The buildings burned were: Frigidaire, furniture and hardware, E. W. Jack's meat market, Ben. Jack's confectionery store and Irving's warehouse. The total loss is between \$50,000 and \$60,000, well covered by insurance.

Some of the people barely escaped with their lives and had to flee into the below new weather in their nightclothes.

Germany's New Career of Frighfulness

New York, Feb. 1st.—This is the day set by Germany to establish its submarine blockade of the British Isles.

Travellers from Germany via Bergen, Norway, a few days ago said that Germany has thirty giant U-boats ready to patrol the blockaded area.

These submersibles, the travellers said have a cruising radius of 6000 miles, a speed of 18 knots on the surface and 12 when submerged. Each is expected to patrol a ten-mile radius, and each is said to have six torpedoes, two rapid fire guns, bomb-laying chambers, and a large supply of bombs and grenades. They are said to carry five-week provisions each.

All Allied vessels carrying contraband or not will be stopped, the crews put in boats and the vessel sunk without parley. Neutral vessels carrying contraband, it is said, will be sunk after their crews have taken to their boats.

BERNSTOFF TO PACK HIS TURKEY

Ottawa, Feb. 1st.—Despatches have been received at the capital from official sources in Washington which indicate that President Wilson has given Ambassador Bernstoff his papers and has ordered the recall of the United States ambassador in Germany. Official circles seem to be positive the information is correct.

Mr. Allen Egan has given a thoroughbred Duroc Jersey Rooster to the Patriotic Fund to be raffled for.

PUBLIC NOTICE
NOTICE is hereby given that cancelled stock-watering reserves which upon inspection by an officer of the Department of the Interior, are found unfit for Agricultural purposes, or for homesteading under the stock clause of the Dominion Lands Regulations, may be taken for grazing purposes on the same conditions as secondary Dominion Lands.
R. L. YORK, Controller.

SYNOPSIS OF CANADIAN NORTH

WEST LAND REGULATIONS.

THE sole head of a family, or any

any male over 16 years old, may

homestead a quarter-section of

available Dominion land, in Manitoba

Saskatchewan or Alberta. An applicant

must appear in person at the Dominion

Land Office, or at the nearest Land

Office, and file an application for the

land. Entry by proxy may be

made, but only in certain cases.

Entry—Six months' residence upon

and cultivation of the land in each

of five years. A homesteader may live

within nine miles of his homestead on

land, or at least 50 acres, on certain

conditions. A habitable house is re-

quired, and where residence is per-

mitted in the winter.

Live stock may be substituted for

cultivation under certain conditions.

In certain districts a homesteader in

good standing may pre-empt a quarter

section alongside his homestead. Price

\$5.00 per acre.

Entry—Six months' residence in

each of three years after earning

homestead patent; also 80 acres extra

cultivation. Pre-emption patent may

be obtained as soon as homesteaded

land is in certain conditions.

Entry—Six months' residence on

homestead right may take a pre-emption

patent. Price \$100 per acre. Entry—Must

reside six months in each of three

WONDERFUL PEACE RAIL COUNTRY OFFERS OPPORTUNITIES TO SETTLERS

RAILWAYS OPENING UP NEW FERTILE DISTRICTS

Peace River Country is Now an Integral Part of Producing Canada, Served With Three Hundred Miles of Railways, and Having a Population of Fifteen Thousand

Had the Canadian Pacific Railway been continued to its original terminus thirty years ago when it went to great cost to have a survey line run from Winnipeg, via Edmonton through the Peace River country and on through the Peace Pass over to Rockies, then down the Fraser to Vancouver, this story could have been written long ago, and the world would have known much earlier of the value of the Peace as one of the richest most fertile sections of the Dominion.

What a little thing frequently was the destiny of human beings, like when a little thing often turns the destinies of a country. Thirty years ago the railroad builders were to studying a map of Canada, and it was marked a red belt, winding from the Pacific to the Atlantic, and the intention was so well believed that to suggest building a line out of or beyond it, some day, was to court ridicule. The great railway building of the world, the Canadian Pacific, began to build its land grants beyond the margin of this supposed "fertile belt." Years passed before the Hudson Bay Company had kept within the fertile belt in choosing the land it was to retain the sale of its holdings to the Dominion.

Time dragged on indefinitely before it was discovered that grain would grow best here first in the Peace River world, and there was an unexpected flow of settlers thirty years ago would be required to fill the southern prairie and plains of the Dominion. It was not within the nature of things that the Dominion should turn at settlement until these western sections were pretty well filled up.

It is true, however, for many years men of vision, who saw the great valley that lay along the river of the Peace, and who saw every little scrap of evidence as to its fertility. They hung round the frontiers, and when they returned from their inner recesses. Newspapers printed all the information they could get, and in time almost all the civilized world had heard of the Peace River valley.

When one day without any cause or clamor, there started from Edmonton the two steel rails pointing north. This was the year 1904, and people knew very little of the man behind it, although they were all looking at him, and notwithstanding many had been started and failed, there was a general feeling that this man would succeed.

For the few years previous to this there had been a general feeling that the Peace River country and were all looking at him, and notwithstanding many had been started and failed, there was a general feeling that this man would succeed.

The start of actual steel laying gave a new impetus to the movement, and by the spring of 1914 many of the districts sections of the Dominion had settlements of considerable size, and farming operations were in full swing. It was felt that the Peace River land was young, and that it would tell it could and would, and was doing so. The Peace River valley was trying his best to improve his home.

Year by year the line of steel crops north, it crossed the Athabasca. It reached the headwaters of the Peace River. It divided at the Round Bay, sending one branch to the Slave Lake, it divided at the Round Bay, sending one branch to the Slave Lake, it divided at the Round Bay, sending one branch to the Slave Lake.

Year by year the line of steel crops north, it crossed the Athabasca. It reached the headwaters of the Peace River. It divided at the Round Bay, sending one branch to the Slave Lake, it divided at the Round Bay, sending one branch to the Slave Lake.

Charming School

Songs in Germany

Teutonic Schoolmasters Incubating Beautiful Ideas in the Youth

Here are two translations of German children's school songs, that are being sung daily. Both of them are creations of the war, both written by schoolmasters. The particularly attractive song about King Edward and England is principally sung by girls—the future mothers of Germany.

"Oh England, Oh England, how great art thou! However great thy crimes, thou shalt be forgiven by schoolmasters. The particularly attractive song about King Edward and England is principally sung by girls—the future mothers of Germany.

"Over there, in the cowardly trenches, lie the enemy. We attack him, we only do not say that mercy should be given today. Strike dead everything which grows for poison. Shoot everything down like a bird. Be a hero, and be a hero, be our prayer in this hour of retreat."

"Fertile belt." Years passed before the Hudson Bay Company had kept within the fertile belt in choosing the land it was to retain the sale of its holdings to the Dominion.

Time dragged on indefinitely before it was discovered that grain would grow best here first in the Peace River world, and there was an unexpected flow of settlers thirty years ago would be required to fill the southern prairie and plains of the Dominion.

It is true, however, for many years men of vision, who saw the great valley that lay along the river of the Peace, and who saw every little scrap of evidence as to its fertility. For Various Reasons, Flax Growing Does Not Appeal to the Farmer

Flax growing has never obtained a firm hold in any part of Canada, and this is not only so because of the climate and soil in most of the provinces are not at all unsuitable to the growing of flax. Also it commands a good market at all times.

Sixty or seventy years ago almost all of the mariners of the world had its field of flax. The fibre was manufactured at home into beautiful fabrics, and was worn by a few of the young people in the East even when they were growing flax in the East.

One of the reasons for the decline of flax might be the introduction of machinery into the flax industry. These took the place of the home woven linen. At the same time satisfactory arrangements could not be made for the marketing of the fibre.

The bureau of statistics of the provincial department of agriculture has recently issued a report on flax in the industry in Saskatchewan. It says that flax has decreased so greatly of late years that it is not worth all the trouble of growing it.

Answers to the first question were very young, and were given in the various districts of the province. (1) How many tons of flax could be grown in the various districts of the province. (2) How many tons of flax could be grown in the various districts of the province.

German Undersea "Blackhole" Disagreeable

Experience of Ship Captains Who 'Were Captured by a Submarine' Again is told by Captain Guthrie, of the American steamer 'Corinthian,' which was destroyed by a German submarine. Captain Guthrie says: 'My ship carried a cargo of 1,000 tons of wheat and 100 tons of flour. We were all saved. I stopped on the demand of the submarine, and I was taken to the German ship with the crew immediately. I did not suffer other losses than two watches with documents.'

"Submarine U-61 at once fired two torpedoes at the 'Corinthian,' which immediately sank. The crew were left in the lifeboats, while I was taken aboard the submarine, which plunged immediately afterwards."

"The submarine was a very small. It contained a little folding table, a folding chair and three wall bunks. All were permeated with the odor of benzine. There was no communication with the exterior cabin. The cabin was absolutely dark, both by night and by day."

"We were given each morning a small portion of coffee. The coffee was at 10, consisted of coffee or tea, and a small portion of coffee. The coffee was at 10, consisted of coffee or tea, and a small portion of coffee."

"The submarine was a very small. It contained a little folding table, a folding chair and three wall bunks. All were permeated with the odor of benzine. There was no communication with the exterior cabin. The cabin was absolutely dark, both by night and by day."

ARMY OF WAR WOUND HEROES ARE RETURNED TO CANADA AS UNFIT

ACCOMMODATION IN HOSPITALS AND SANITARIA

Great National Work is in Hands of a Well Organized Staff, Who Are Attending to all Details in Connection with Caring and Providing for Returned Soldiers

Shrewd Buyers

Getting Best Lands

Canadians and Americans Think Now Is Fine Buying Time

A Calgary firm has recently sold \$250,000 worth of choice Alberta land to Alberta farmers, and sales have been made amounting to over \$500,000 to buyers from the States.

Most of the land sold to Alberta buyers has been purchased by prosperous Alberta farmers, who know the value of these lands and the purchase of the land will be made at a low price.

The buyers from the States have been buying the land for a number of years, and they have bought the best land and paid the higher prices. They have made a large profit on the land.

After the war is over there will be a large demand for prime lands in Alberta, and there will be thousands of buyers come to Alberta. They will be buying the land for a number of years, and they have bought the best land and paid the higher prices.
